2026-07-31 (1 month
from now)

Description

We are looking for an independent **Cybersecurity Auditor** to conduct a formal **cybersecurity audit** of **22 critical systems**, covering **industrial systems**, **information systems**, and technical infrastructure for a regulated **critical infrastructure** environment. The audit will follow the **NKSC**-approved methodology and the **Lithuanian Cybersecurity Law (KSI)**, with a focus on technical and organisational control assessment, maturity evaluation, and audit-grade documentation supported by qualified **electronic signatures**.

Key Responsibilities:

- Conduct interviews with system administrators and review evidence across **22 critical systems**.
- Assess compliance with **KSI** using a **3-level maturity scale**.
- Evaluate baseline **cybersecurity controls**, identify non-conformities, and prepare a remediation action plan.
- Prepare and agree on an Audit Plan within the required timeline, including interim and final audit reporting.
- Present findings during a closing meeting and deliver complete audit-grade documentation signed with qualified **electronic signatures**.
- Maintain full independence, impartiality, and conflict-of-interest compliance throughout the engagement.

Must-Have Requirements:

- Certified **information systems security compliance auditor** from an internationally recognised organisation, such as **CISA, ISO 27001 Lead Auditor**, or equivalent.
- Completion of **NKSC**-prescribed training and successful qualification examination.
- Strong knowledge of **KSI, NIS2**-aligned frameworks, and applicable Lithuanian regulatory requirements.
- Full compliance with **NKSC** independence, impartiality, and integrity requirements.
- Ability to work as part of a team of up to **3 auditors**, with all members meeting minimum qualification requirements.
- No operational or management responsibility for any systems being assessed.
- No conflict of interest with the audited entity, with any conflict reported in writing within the required timeframe.

Required Skills

IMPLEMENTATION

IT Security 4-5 years
