Aprašymas

We are looking for experienced Flexcube System Analysts to strengthen a Core Banking team focused on developing and improving the FLEXCUBE platform.

The team is currently heavily engaged in product setup activities, creating gaps in platform-level development and technical debt. Additional support is needed for core functionality improvements, migration initiatives, and ongoing transformation programs.

This is a techno-functional role requiring strong core banking knowledge combined with hands-on FLEXCUBE experience.

Must-have skills:

- Strong hands-on experience with core banking operations.
- Practical knowledge of:
 - Account lifecycle.
 - Interest & fee calculations.
 - Accounting entries.
 - Regulatory reporting concepts.
- Strong hands-on experience with FLEXCUBE:
 - Product setup & parameters.
 - Events, accounting roles & rules.
 - FLEXCUBE architecture (DB, application, interfaces).
- Technical skills:
 - SQL for analysis & validation.
 - SOAP/REST web services.
 - XML messages.

- UNIX/Linux logs.
- Strong analytical and communication skills.
- Experience working in production/support environments.
- Fluent English.

Nice to have:

- Knowledge of ISO 20022 / SWIFT MT/MX
- FLEXCUBE certifications
