Description

The role focuses on quality assurance for a **banking** mobile application project. The specialist will support end-to-end testing across **Android**, **iOS**, **API**, frontend, backend, and integration layers, while contributing to automated testing using **Java**, **Selenide**, **TestNG**, and cloud-based testing platforms such as **LambdaTest**.

Key Responsibilities:

- Perform end-to-end testing of mobile applications across **Android** and **iOS** platforms.
- Conduct **UI testing** and **API testing** to validate backend communication and messaging.
- Ensure quality across frontend, backend, and integration points.
- Collaborate with developers and product teams to align on testing scope and coverage.
- Contribute to the design, development, and maintenance of automated test suites.
- Participate in manual exploratory testing for new features when needed.

Must-Have Requirements:

- **Middle-Senior** experience in software testing and quality assurance.
- Strong knowledge of software testing principles and **QA methodologies**.
- Proficiency in **Java** for test automation.
- Experience with **Selenide** for **UI automation**.

- Experience with **TestNG** for test orchestration and reporting.
- Experience with **LambdaTest** or similar cloud testing platforms.
- Familiarity with **REST-assured**, **Postman**, or similar **API testing** tools.
- Ability to write automated **API tests** integrated into **CI/CD pipelines**.
- Experience with **GitLab CI** or similar **CI/CD** tools.
- Ability to define and maintain test plans, test cases, and test data.
- Experience with bug tracking and test management tools such as **Jira**.
- Strong communication skills for working with cross-functional teams.
