QA ENGINEER
UAB Probanx Solutions

www.probanx.com/

Vilnius, Литва

This assignment expired :when

Description

A Lithuanian financial technology company **„Probanx Solutions"** managed by **„iSignthis"**. Australian Securities and Frankfurt Stock Exchange listed „iSignthis Ltd" (ASX: ISX), is the global RegTech leader in remote identity verification, payment authentication and payment processing. iSignthis provides an end-to-end on-boarding service for merchants, with a unified payment and identity service via our Paydentity™ and ISXPay® solutions.

„Probanx solutions" develops specialized banking software that ensures connection to the Single Euro Payments Area (SEPA). The company also develops programs to help financial institutions authorize customers, manage electronic documents, ensure compliance with money laundering and terrorist financing requirements, and other solutions. „Probanx solutions" has already planned projects in the UK and New Zealand and other countries this year. The Lithuanian company will also work on joint projects with „Probanx Ltd", another Cyprus company managed by „iSignthis".

Currently we have an exciting opportunity for a **QA ENGINEER** to join us in our Vilnius office in Lithuania.

We are looking for an enthusiastic professional who can design, develop and execute exploratory and test scenarios to ensure quality of products. Our ideal candidate will be responsible for conducting tests before product launches to ensure that software runs smoothly and meets client needs, while being cost-effective.

Duties and Responsibilities

Ø Review requirements, specifications and technical design documents to provide timely and meaningful feedback

Ø Create detailed, comprehensive and well-structured test plans and test cases

Ø Create and maintain manuals and documentation

Ø Estimate, prioritize, plan and coordinate testing activities

Ø Identify, record, document thoroughly and track bugs

Ø Perform thorough regression testing when bugs are resolved

Ø Develop and apply testing processed for new and existing products to meet client needs

Ø Liaise with internal teams (e.g. developers and product managers) to identify system requirements

Ø Monitor debugging process results

Ø Track quality assurance metrics, like defect densities and open defect counts

Ø Stay up-to-date with new testing tools and test strategies

Requirements

Ø BS/MS Degree in Computer Science, Engineering or related field

Ø Proven work experience in software Quality Assurance

Ø Strong knowledge of software QC methodologies, tools processes

Ø Experience in writing clear, concise and comprehensive test plans and test cases

Ø Experience working in an Agile/Scrum development process

The Company offers

Ø Opportunities for improvement within the company - interesting international projects and the opportunity to realize your ideas;

Ø Possibility to work in another company group according to internal exchange program;

Ø Competitive salary that matches knowledge and results, and bonuses based on the results achieved;

Ø Private health insurance.

How to Apply

Interested applicants are encouraged to apply by sending their CV to careers@isxfinancial.com quoting "QA Engineer".
