Description

Be part of a Core Banking team modernizing and supporting mission-critical services for a leading **banking** platform. You will deliver new features, reduce technical debt, and ensure regulatory compliance using **Java 11/17+**, **Spring Boot**, **REST APIs**, and **microservices** on highly available, enterprise-scale systems. Expertise with **Kafka**, **Oracle Database**, and **event-driven architectures** is key to maintaining resilient integrations with digital channels.

Key Responsibilities:

- Design, build, and maintain **Java** microservices with **Spring Boot** and **JPA/Hibernate**.
- Develop and integrate **REST/SOAP** services and **Kafka**-based messaging solutions.
- Optimize **SQL** queries and ensure performance on **Oracle Database**.
- Contribute to core banking transformation and legacy-modernization initiatives.
- Collaborate in **Agile/Scrum** teams, providing technical leadership and code reviews.
- Ensure high availability, resilience, and regulatory compliance across distributed systems.

Must-Have Requirements:

- **5+ years** of enterprise **Java** development (Java 11/17+).
- Deep **Spring Framework / Spring Boot** expertise.
- Proven experience with **REST APIs, microservices, and event-driven architectures.**
- Hands-on with **JPA/Hibernate, Maven or Gradle.**
- Proficiency in **Kafka** (or similar messaging) and **Oracle Database** performance tuning.
- Solid grasp of **core banking architecture**, integration patterns, and high-availability design.
- Experience in production-critical **financial** environments and **Agile/Scrum** delivery.
- Fluent English plus strong analytical and stakeholder-communication skills.

Nice to Have:

- Exposure to core banking platforms such as **Oracle FLEXCUBE, Temenos T24, Finacle, Mambu, or Thought Machine.**
- Experience with **Git, CI/CD** pipelines, **Kubernetes/OpenShift**, and **AWS / Azure / GCP.**
- Knowledge of **Domain-Driven Design (DDD)**, automated testing, and **ISO 20022 / SWIFT** standards.
- Background in core banking migration or transformation programs.

Required Skills

PROGRAMMING

Java 5-6 years
