Description

RIVILE is the leading accounting, finance, and ERP system provider in Lithuania. "Financial Times" nominated Rivile as one of "1000 Europe's Fastest Growing Companies 2022". We are building a new cloud SAAS B2B products to break into international markets.

The company invites a **Senior Software Engineer / Tech Lead (JAVA)** to join our team.

Join us if you really desire and can build scalable products for **tens of thousands of companies and individuals**, join us if you want to leave a footprint in our society.

About the role:

- You will be one of the key persons responsible to design and develop a reusable, secure, stable, and scalable new ERP (Enterprise Resource Planning) product as a web multitenant application using Java;
- You will be focusing on the most complex tasks of ERP product development from architecture to development, although some basic development you will be able to delegate some;
- You will be part of a team of mostly senior developers. You will work in a self-managed team

together with other developers, product manager, and designer to create and develop a product that will be easy to use and rich in functionalities that helps companies grow;

- You will ensure system stability by writing unit, regression, integration, and e2e tests, contribute to improve the system performance and security;
- You will participate in agile software development routines and Scrum activities from sprint planning to retrospectives.

Requirements:

We expect **strong knowledge of Java with 7 years of experience building SAAS multi-tenant solutions which brings the ability to design and develop complex solutions.**

Requirements of experience (mandatory):

- Java 11/17;
- Spring ecosystem (Core, Boot, Web, Data and Security, Spring Cloud, Spring Integration);
- Hibernate;
- Event-driven microservices with CQRS (Common Quarry Responsibility Segregation);
- Saga design pattern;
- Domain-Driven Design;
- Unit/integration testing;
- Performance testing;
- Databases NoSQL and RDBMS (preferred Postgres/SQL server);
- Docker and Kubernetes;
- Web security concepts.

Requirements of experience (preferably, makes you stand out)

- GraphQL;
- Event-driven frameworks like Axon or Eventuate;
- Multi-tenancy;
- BDD (Behavior Driven Development) testing;
- CI/CD with GitHub Actions and GCP;
- Basic communication skills in English since we are an international, globally distributed team, a big part of communication is in Lithuanian;
- Background in ERP systems would make you really stand out.

We offer

- Bonuses related to product performance;

- Pride – you will see your product on many companies' monitors, tablets, and phones;
- Respect for individual opinion while working on team consensus;
- Lots of freedom and responsibility;
- Training/conferences/self-improvement;
- Flexible workplace Vilnius / Kaunas / internationally / from home
- Market-level salary rate from 4000 neto or 40 eur/h.
