At **4finance**, we have an **entrepreneurial** mindset and **strive for excellence**, yet **keep things simple**. Our business is driven by leading-edge technology and our talented **people** - the most important ingredient of our success. **4finance** has created a supportive, rewarding, and empowering environment, where employees can grow their talent. We are proud to have a global network of leading experts, who are driven by passion to deliver.

We love what we do!

Join our team! We are looking for a Software Developer - Java in the Vilnius office.

About the role:

Our Java Developers assist in the design of software systems following business needs, write maintainable and well-tested code, and take responsibility for delivery and maintenance of developed software as part

of our Software Development teams.

Responsibilities:

- Cooperate with team members, and architects to develop reliable business solutions;
- Build and validate new functionality covered with unit, integration, and acceptance tests;
- Ensure knowledge sharing within the team;
- Do code reviews;
- Keep up with the latest technological developments, and look ahead for future products;
- Constantly improve technical stack;
- Participate in the hiring process of new talents.

Required experience:

- Working experience in an enterprise company with Java;
- Strong knowledge of Java;
- Experience working with Relational Databases;
- Strong experience implementing Web Applications;
- Strong experience working in a defined Software Development Process (e.g., Scrum, Kanban);
- Strong experience in the Software development process (automation) toolchain (version control systems, IDEs, build systems, CI/CD pipelines, test frameworks, issue tracking/project management tools, etc.);
- Proven knowledge of design patterns;
- Experience maintaining and supporting production critical systems;
- Experience in Test Driven Development.

Soft skills:

- Good verbal and written English and Lithuanian (must) languages;
- Work as an effective team member;
- Be able to share knowledge with team members;
- The ability to work independently.

Nice to have:

- Experience with AWS;
- Java certifications;
- Experience building fintech solutions;
- Working experience in a mid to large-scale IT organization (at least 40 members);
- Experience with front-end technologies (e.g.: JavaScript, HTML, CSS, etc.);
- Experience building/supporting high-load web

applications and solving scalability issues.

We are offering:

- Challenging products/projects that you will have a real impact on moving forward and delivering;
- Exciting cloud-based operations technology stack
- Be part of innovative, ambitious, highly skilled, and professional teams;
- Work in an international company operating in an exciting, competitive, and fast-paced industry;
- Employee development program to support you in your personal and professional development;
- Competitive salary with participation in the annual bonus program;
- Team Building events;
- Birthday & Christmas Gifts;
- Modern Office with parking;
- Gross salary up to 4800€/month.
