## Apie Mane

In 2006 I have successfully finished Software Engineering bachelor degree at Vilnius University.

My career in IT started back in 2005. At first I was working as a developer and in 2007 I started to work as a team member in the international IT software implementation projects:

- 2007-2010 I worked in Warsaw (Poland). During this project I had a change to work on multiple roles of the project (developer, consultant, business analyst and team lead).
- 2010-2016 I worked in Johannesburg (South Africa) on multiple project roles (developer, business analyst, team lead, account manager).

Following is the list of certificates I have:

- PRINCE II Foundation (2012);
- Award for the Foundation Insurance Test (2014);
- ITIL Foundation (2014);
- PRINCE II Practitioner (2015).

My strongest characteristics are: responsibility, knowledge, concentration on the goals, hardworking and dedication to work, communication with the project team members and clients.
