Description

Behalf of our client, we are looking for Python Full-stack Engineer (permanent position),

Description:

As a Python Fullstack Engineer, you will be embedded within the AXA XL account, contributing to the development and modernization of insurance platforms, client portals, and AI-driven solutions. You will work in a cross-functional team to deliver scalable, secure, and high-performance applications that support AXA XL's global commercial insurance operations.

Key Responsibilities:

- Design, develop, and maintain full-stack applications using Python (FastAPI, Flask) and JavaScript (React, TypeScript).
- Collaborate with product managers, designers, and other engineers to build intuitive user interfaces and robust backend services.
- Participate in the development of AI modules and data engineering pipelines for AXA XL's Digital Flow and Global Programs Portal initiatives.
- Integrate with cloud-native services on Azure, including Azure Functions, Azure Data Factory, and Azure Databricks.
- Ensure code quality through unit testing, code reviews, and CI/CD pipelines.
- Contribute to knowledge sharing and documentation efforts across the AXA XL engineering team.

Required Skills & Experience:

- Bachelor's or Master's degree in Computer Science or related.
- Extensive professional software development experience, with a moderate level of proficiency in Python, Java, and/or other languages.
- Demonstrated success in designing, building, and maintaining complex, high-performance applications.
- Expertise in frameworks like Django, Flask, or FastAPI.
- Proficiency in working with both SQL and NoSQL databases.
- Knowledge of cloud platforms (AWS, Azure), containerization (Docker, Kubernetes), and CI/CD pipelines.
- Familiarity with microservices architecture and distributed systems.
- Experience in leading development teams and mentoring developers..
- Robust analytical and problem-solving skills, with the ability to troubleshoot complex issues.
- Excellent communication skills, capable of translating complex technical concepts for both technical and non-technical audiences.
- Effective collaboration skills, with a proven ability to work closely with cross-functional teams.

Preferred Qualifications:

- Experience with AI/ML integration or data engineering (e.g., PySpark, Azure Databricks).
- Exposure to DevOps practices, including Docker, Jenkins, and Terraform.
- Knowledge of ETL pipelines, scheduling tools (e.g., Autosys), and event-driven architecture.

What we offer:

Opportunity to be part of a global organization. Encouraging working atmosphere, engaging activities, and extra benefits (e.g. additional medical insurance (covers gym subscription), team events, outreach activities, and others);

Hybrid work model with remote work opportunities.

Open, modern, and ergonomic work environment when working from the office with the multicultural community.

Opportunity to grow professionally and personally (e.g.

Udemy) and continuously develop within the domain.

The salary range for this position is from 4.125 to 6.875 gross before taxes.*

*Salary offer for the candidate is determined based on the predefined salary ranges for the position and depends on the level of competence and experience of the candidate.

Cognizant, as a digital company, makes employee health and safety its top priority. With that in mind, we are implementing virtual hiring and work practices which means all interviews will be conducted online as well as live from the office

We will be looking forward to Your CV. Only suitable candidates will be contacted within 7 days from application.
