Personal Statement

I am capable of easily communicating with clients and colleagues, that allows me to easily identify their wishes or problems, which enables me to offer them the solution or the required steps to solve the issue. I am okay with working on my own, but i would always prefer to be working in a team. I never give up, my current skills are gained through hard work and trying over and over again, i do not have a single project which i would have failed, though i do have some projects that i could have implemented better mostly due to lack of time. I tend to get lost in time while working on interesting projects and sometimes find myself working well over 10 hours per day.
