Personal Statement

I have worked in telecommunication sector for 4 years. In service administration specialist role I implemented a lot internal projects. Mobile number porting database renewal, internal knowledge base establishment, created raports for monthly prevention check of services. As IT analyst I have worked 9 months, I developed few projects with third party. My main project was to integrate Google play servives with mobile vendor services it was successful and now costumers have opportunity to pay fo Google play purchases by their mobile account. Also I worked with internal projects, helped marketing team to customize new services. Have experience in writing Funcional specifications, test scenarios preparation.

I am currently living in Canada so could work from home.

Have recommendation from previous employer if needed.
