Aprašymas

We are looking for **Backend Engineers** with strong **Golang** experience to support the development and migration of a **SaaS** product in the **marketplace** sector. The role involves building scalable backend services, supporting migration activities, and collaborating closely with the team in a flexible project setup. Occasional on-site work in **Vilnius** may be expected.

Key Responsibilities:

- Develop and maintain backend services using **Golang**
- Support migration activities for a growing **SaaS** product
- Build scalable, reliable, and maintainable backend solutions
- Collaborate with cross-functional teams to refine and deliver technical requirements
- Contribute to a flexible delivery setup as project needs evolve
- Participate in technical discussions and interviews where needed to ensure strong team fit

Must-Have Requirements:

- Strong hands-on experience with **Golang** backend development
- Experience working on **SaaS** products or scalable backend systems
- Ability to work flexibly in a changing project

environment

- Availability for occasional on-site work in **Vilnius**
- **Lithuanian** language skills preferred
- Strong collaboration skills and cultural fit within a fast-moving product team
