Description

Ruptela is looking for a **Senior Quality Assurance Engineer** to join one of our talented development team.

We have created a feature-rich backend architecture and modern UI. Together these provide the leading Fleet management platform, which serves over 200K active units worldwide. We help organizations in transportation industry to manage and improve efficiency of their business operations with up to date technologies (Hardware & Software).

You will work side-by-side with development team in creating high-quality Software as a SaaS (Service). QA Engineer is expected to be strong technically with automation testing experience / background with strong methodology around Agility and transparency.

YOUR ROLE:

- Be a trusted QA guild leader, who will be driving automation, integrating with CI/CD pipelines
- As a part of a development team, you will also write backend integration tests and tests for REST APIs
- Develop frameworks and automated test cases using Selenium
- Design and develop integration, regression, and stress tests using industry standard tools
- Collaborate with Product Owner and Developers

to understand requirements and translate them into test cases
- Define, implement, and maintain test plans, test specifications and test suites
- Monitor, review quality data and metrics

REQUIREMENTS

- Expertise in TestNG, Selenium frameworks
- Solid knowledge in Spring, Appium frameworks
- Solid knowledge of QA methodologies, processes
- Solid knowledge with GIT, Maven (or other build and code repository tools)
- Experience working with client-server architectures and automation
- Experience working with black box/grey box testing
- Solid knowledge of SQL and scripting
- Very good knowledge of WEB/UI testing
- Experience with Dockers would give you extra point

OUR PROMISE

- Opportunity to work in interesting projects with the latest technologies
- Constant exposure to opportunities for professional growth
- Freedom and responsibility to think of solutions, not just to do what you are told
- Ability to make an impact in Product portfolio
- Liberal conditions for work – remote work culture, result-oriented approach to work
- Diverse motivational package and additional health insurance
